

Math Video Project

You are being tasked with creating a video project for your math class. This video will be used to help prepare for final exams. The idea behind the video is to create something that is based on a topic from this semester, design a creative multimedia presentation of that topic, and present it to the class to help your peers review the content.

*Groups will be made of up no more than 4 people. Everyone must take part in the creation of the video. You don't have to be on camera, but everyone must participate.

*Group roles will need to be established and provided to your teacher.

*A topic must be submitted to your teacher and approved.

*Creativity is key. The more creative, the better. Try not to take yourself too seriously.

*Videos will need to be a minimum of 3 minutes in length. (please do not exceed 8 minutes)

*I am not providing any structure on how video is created. You can do a skit, a song, a rap video, a horror movie, etc. The only limit is your creativity.

*Group evaluations and class/peer evaluations will also be given during presentations. These evaluations will be taken into consideration when grading.

Group members will be due on 11/14 and 11/15

Topics will be due on 11/16

Video projects will be due on 12/7

****NO LATE WORK WILL BE ACCEPTED****

****Detach along this line and return to your teacher****
